EDUCOV

Supporting parents in the Covid times

Activities in project

FOURTH NEWSLETTER

We are pleased to announce exciting activities and updates for the EduCOV project. We are dedicated to supporting parents in this challenging time of pandemic by providing informative and innovative tools and guidance through training courses and online resources.

We have recently launched a final training program for parents and teachers. This training is designed to provide an overview of the best practices for managing homeschooling during pandemic. It also offers detailed instructional materials on implementing the EduCOV method in practice. The program is divided into two parts: the first focuses on teaching strategies, and the second focuses on exploring practical ways to support children's learning at home. Participants will gain valuable knowledge on current topics related to education in a pandemic environment, such as virtual learning, parenting strategies, assessment techniques, etc.

In addition, we have developed a guidebook for teachers and parents, providing invaluable tips and advice for implementing the EduCOV methodology at home. The guidebook for Teachers includes detailed information on using the method with inexperienced learners. In contrast, the Guidebook for Parents includes step-by-step examples of effectively organising home support systems. These guides can be accessed online or downloaded as a PDF file.

Finally, we have developed bite-sized eLearning resources that comprehensively cover all aspects of effective teaching during Covid-19 times. These eLearning resources are explicitly tailored to meet the needs of both educators and parents alike - covering topics such as virtual lesson planning, student engagement strategies and more! They can be utilised individually or with other educational materials from our platform.
